

OFFICIAL DOCUMENTS CORD BLOOD

The WMDA (World Marrow Donor Association) develops template forms that organizations can use to cover the search process through the delivery of the stem cells at the transplant facility. All forms are reviewed on a yearly basis and changes are implemented if necessary (current version posted on the www.wmda.info website).

MDPB uses WMDA forms and supplementary MDPB templates.

Below you will find all forms to be used by the MDPB coworkers (forms in fillable and savable format – current versions posted on <https://stemcelldonor.be>).

Available MDPB, WMDA or customized templates by the cord blood banks may be used.

MDPB FRM001 Preliminary search request v4 (Belgian patient)
S10 Preliminary search request v20210617(International patient)

MDPB FRM003 Request for further DNA based cord typing v2
